

## JUDGE/COACH NOTES – April 18, 2017

**EVENT: PESARO WORLD CUP**

**PRESENTER: CAROLINE HUNT**

**FROM: OLGA KHABAROVA**

### **Evaluate the shape performed:**

Ex: Split position or very slight deviation from split Horizontal Back bent of the trunk (not just head and shoulders) closed ring position (touching or very close)

### **Fundamental apparatus element should be performed:**

Jump: during the flight(not landing)

Balance: during stop position

Pivot. during 360 base rotation

Attention to apparatus element with BD: sometimes none performed; performed before or after BD;  
Not performed according to definition in 3.3 & 3.4

Small toss of clubs should be thrown and caught to be counted

### **Major technical fault with apparatus are:**

Loss

Static apparatus (held for more than 4 sec.)

Imprecise trajectory and catch in flight with 2 or more steps; chasses steps in R

Unusable apparatus

Involuntary wrapping or knot with interruption (rope, ribbon)

Catch (contact with the arm)

### **Rhythmic steps are not counted if:**

Missing LH

Short

Only one movement variety (rhythm, direction, level)

### **Risks:**

Large or medium throw

Min 2 rotations 360 each!!!!

It has to be caught

5.1.3 R value is determined by the number of rotations and executed criteria: if the final criteria is executed after the catch, this rotation and criteria belonging to this rotation (possibly level or axis) are not valid.

Each rotation (pre acrobatic, chaine, etc.) may be performed either isolated or in series only 1 time.

Direct re-throw/rebound without any stops is the main part of R, in this case it's necessary to catch the re-throw for R to be valid.

Criteria during re -throw/ re -bound are valid.

Criteria during catch after re-throw is not evaluated as part of **R** because in most cases, the height is not the same as initial throw. The catch of the re-throw may be used as part of **AD**.

Each AD must be different

Apparatus base + criteria by itself is not **AD**. Must be technically difficult synchronization between apparatus & body consisting of min. 1 Base + minimum 2 criteria or 2 bases + 1 criteria

Or

Interesting or innovative use of apparatus (not standard) consisting of min. 1 base + a min. 2 criteria or 2 bases + 1 criteria. Criteria often executed after the base (ex . Rotation)

"Missing penalty" is taken when no visible attempt made (less than one difficulty from each body group)

### **Groups**

Only **EX** by medium or large throws valid as **ED**. When gymnasts are on the floor for the throw, they must have a distance of 6m to be a medium throw.

For criteria on the floor, gymnasts should already be on the floor before performing throw or catch.

2.2.4 **BD** with value of 0.1 may be performed during the **ED** (as criteria in the value of the **ED**) but will not count as **BD**. A **BD** with value of more than 0.1 performed during **ED** will not be evaluated as a **BD** not counted as criteria for the **ED**

**5.6** the same rotation (pre-acrobatic elements, chaîné, etc.) may be used one time in R and one time in ED and /or in C: if the same rotation is repeated in **ED**, this criteria is not valid (the **ED** is valid because the required action of throw and catch are executed) For **CR, CRR CRRR** when executed by a min 1 gymnast performing the main action in the collaboration: body rotation with loss of visual control, valid one time per throw and one time by catch per collaboration with rotation.
